**SENTRY'S PERFECT PRIME RIB**

what you need...

- 5 lbs beef prime rib
- Sea salt
- 2 tsp freshly ground black pepper
- 1 tsp fresh rosemary
- 1 tsp fresh thyme
- 8 cloves garlic, minced
- 1/4 cup olive oil

make it...

**BRING** meat to room temperature: Remove prime rib from the refrigerator one hour before cooking. Season it on all sides with salt and cover it loosely with plastic wrap as it comes to room temperature.  
**ADJUST** oven racks so the meat will cook in the center of the oven. Preheat the oven to 500 degrees F.  
**MIX** together 1 1/2 teaspoons sea salt, pepper, rosemary, thyme, garlic, and olive oil.  
**PAT** the roast with paper towels. Spoon seasoning over it, rubbing it onto all sides. Place bone-in roast with the bones down, inside a roasting cast iron pan. Place a boneless roast on a rack inside the pan.  
**BAKE** prime rib at 500 degrees for 15 minutes.  
**REDUCE** the oven temperature to 325 degrees and continue baking until desired level of doneness. The meat will continue to cook as it rests out of the oven. Remove it 5-10 degrees before it reaches your optimal temperature. Use a meat thermometer to check the temperature of the meat.  
• Rare: 120 degrees F (about 10-12 min/pound), • Medium Rare: 130 degrees F (about 13-14 min/pound)  
• Medium: 140 degrees F (about 14-15 min/pound) • Medium Well: 150 degrees F  
**REMOVE** roast from the oven and tent it with foil. Allow it to rest for 30 minutes before carving.  
**CARVE** prime rib roast by slicing against the grain into about 1/2-inch-thick slices.
